I know I'm pestering you now but, please don't shoot the messenger....you know this already but, I just want to kindly remind you that EPA is prepared to support TCEQ if you should need any assistance with monitoring debris staging areas.... TCEQ and EPA both want to be sure things are running well at the staging areas in terms of proper segregation and ultimately disposal. EPA can support your folks at the staging areas by providing supplemental monitoring folks to help assure segregation happens as we did at the Ike response (as well as multiple Louisiana hurricane responses).

Thanks! Just call with any concerns.
